BT SKI

BLUETOOTH STEREO SPEAKERS® - INTERCOM

Midland BT SKI is the smallest, most practical Bluetooth device for communication and entertainment in winter sports and recreational activities.

You can wear the Bluetooth device with a convenient ear warmer earpiece (standard version) or apply it to your ski helmet (universal helmet version).

It makes it perfectly safe to talk on the phone, converse freely with another **Midland BT SKI** user within a range of 200m in Intercom mode or enjoy your favourite music.

Midland BT SKI is easy to use and compatible with all latest generation mobile phones with Bluetooth!

Midland BT SKI also has a plug for wire connection with an iPod/MP3 player or a PMR446 Midland transceiver to converse with groups of several users.

**BT SKI - STANDARD VERSION
USE WITH EAR WARMERS**

Intercom: 200m

Communicate hand free

MIDLAND G8E-BT

PMR446 TRANSCEIVER WITH INTEGRATED BLUETOOTH TECHNOLOGY

The **Midland G8E-BT** is a transceiver with Bluetooth technology requiring no cable connection: this makes it a practical, versatile device for use in perfect freedom with earphones for Bluetooth telephones or for sports and motorcycles.

The **Midland G8E-BT** is waterproof and **has a PTT** (push to talk) button on the outside flush with the mounting, making it the ideal accessory for sports, bicycles and motorcycles.

Used with a Midland BT Intercom earphone, it permits **group communications among several people up to 5 Km apart**.

The **Midland G8E-BT** is the perfect communication tool for people who want a radio and a Bluetooth earphone for professional/industrial or sporting/recreational use.

FEATURES

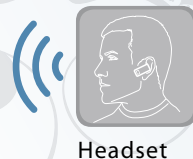

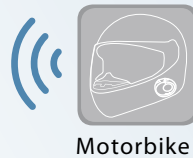

- › Integrated Bluetooth for wireless communication
- › Vox with "TalkBack™"
- › Intercom function
- › 8 PMR446 channels + 16 pre-recorded channels
- › 38 CTCSS tones - 104 DCS tones
- › Waterproofness: IPX5
- › Vibracall
- › Call function with 5 melodies
- › Out of Range, Dual watch
- › Keypad lock, Scan, Monitor
- › Battery status indicator and Power save function

PACKAGE AND CODES

Radio, wired PTT box, 800mAh Ni-MH battery pack, belt clip, single desktop charger, wall adapter

code C975

OPTIONAL ACCESSORIES: SEE ACCESSORIES ON PAGE 10

MIDLAND 777

PMR446 TRANSCEIVER

Midland 777 is convenient and easy to handle thanks to its small size and to a series of special optional accessories.

It may be used and worn with the **MA Neck Collar 1 Pin accessory code C983** supplied with earphone and **PTT** button for easy communication during sports and recreational activities.

The Midland 777 may be used **in combination with the BT SKI** device (with the optional **Kit 129**) for **group radio communications**, keeping the mobile phone answering and Intercom functions active separately.

FEATURES

- › Voice activated VOX function
(Talk with free hands, without pressing the PTT button)
- › CTCSS for configuring up to 312 channels
(to allow you to create your own channels with no interference)
- › CALL BUTTON call signal function
(to tell others you want to start talking)
- › Roger Beep, signalling end of transmission
(tells you it's your turn to speak)
